

Renewable Energy Projects Wanted

Funding for Community Based Renewable Energy Projects

Opportunity: Access funds to help cover the capital costs to install qualifying, new renewable energy systems at non-residential sites within the Pacific Power service area.

- Projects may involve wind, solar PV, geothermal, wave, low-emissions biomass, certified low-impact hydro, pipeline or irrigation canal hydropower systems.
- Of particular interest are projects that can advance new and emerging technologies, including solar PV tied to electric vehicle charging and provide community benefits.

Deadline: Applications for funding are due **May 31, 2016 at 5 p.m.**

How to apply: The 2016 application form, along with detailed eligibility guidelines, evaluation criteria, and award recipient requirements is available at pacificpower.net/blueskyfunds.

Contact blueskyprojects@pacificpower.net with questions.
